TRIMSET™
Aluminum Finish and Edge Protection for 1/8” Wall Panels and Tiles.

Aluminum Trim Specifications
1/8” aluminum trim provides a protective metal shield at panel edges and corners that accent panel joints and facilitates accurate panel alignment.
» Profile standard length: 10’-0”
» Extruded aluminum, 6063 alloy, T5 temper
» Standard finish: Clear satin anodized
» Custom finish options: Black, bronze and nickel anodized; powder coat paint

Trimset hardware is installed onto a standard construction wall substrate. Hardware intersections require field cutting of profile ends to permit the joint intersection to have a continuous surface plane and sit flush with the incoming panel.

The example above is a general assembly perspective. Hardware will vary based on panel layout.
